

As you probably know Dish Network and Viacom are in a price war. Why I understand what they are doing, it's the people that are suffering. I subscribe to Dish Network and receive all the channels they offer plus local. This morning I woke up and I can't receive MTV, Nick channels and KEYE (one local channel). I was not notified of any changes and I'm not being compensated for the channels either. Dish Network offered \$1.00 off all our monthly bill and 4 other channels that I already pay for. They won't let me cancel or give me any other offers as required under our contract to my understanding.
